MANTIS, 20 YEARS AND OVER A MILLION TILLERS, OFFERS MORE!

Southampton, PA – Having reached the one-million-sold milestone after just 20 years, the Mantis Tiller/Cultivator is undeniably the most popular mini-tiller in the world. It's small, it's durable, it's efficient, it does an impressive array of jobs, and it doesn't cost a lot of money.

This powerful little tiller and its optional attachments have been used to cultivate soil, weed gardens, dig furrows, aerate and dethatch lawns, edge borders, dig holes for planting trees and ornamentals, and even trim hedges in every state in the USA and every province in Canada. Mantis Tillers are now used around the world in countries ranging from Great Britain and Germany to South Africa and China.

Mantis is best known for the famous Mantis 20-pound Tiller. Mantis has been manufacturing and selling the Mantis Tiller for over 20 years.

Mantis has several other products that it manufactures and sells.

The Mantis Compost-Twin: The only 2 chamber - revolving compost bin. Two large, 10-bushel compartments allow you to continually make compost in one chamber as you're adding your throw-aways and recyclables to the second chamber. The Compost-Twin allows you to have all of the advantages of two bins in one composter.

The Mantis SprayPartner: A 12-gallon, battery-operated sprayer on wheels. Convenient for all of your spraying needs. Sprays up to 25-feet.

Mantis LOADUMPER. A multi-purpose wheeled cart with 500 lb. capacity and push down handle. The front of the cart lifts up to make rolling virtually effortless.

Mantis sells its product line worldwide. All of the products are made with the homeowner in mind, but built with the quality and durability that any professional contractor would appreciate.

Over the years, the Mantis Tiller has received many awards, such as the Consumers' Digest Best Buy Award, The American Handyman Award, and a "Member Tested and Recommended" Seal of Approval from the National Home Gardening Club.

Mantis is constantly striving to bring new products and product improvements to the market. Most recently, the Mantis Tiller is available with a 4-cycle Honda Engine and now there is a Mantis Electric Tiller.
